MaxEnterprise Facility Scheduling Software

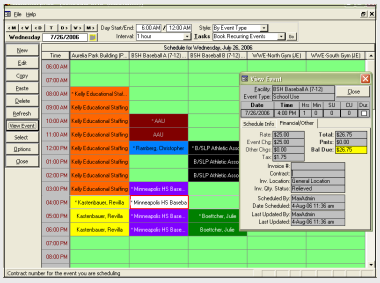
Regarded as the most powerful facility scheduling software available!

Our flagship product, Facility Scheduling, is currently in use in over 600 customer locations throughout the world. This powerful facility-scheduling product allows users to take reservations and schedule events in virtually any facility type and we are one of the only software vendors who can handling scheduling of more complex facilities such like ice arenas and aquatic centers.

Our software tracks you reservations, customers, billing and receivables, as well as generating marketing mail/ email campaigns. Many powerful tools in just one product. This software will streamline your operations while allowing you to focus on other areas of your business; while also improving customer service, staff productivity, and overall profitability.

Facility Scheduling Features

Facility Setup. Each facility is allowed its own season, business day, and maintenance options and handles an unlimited amount of hourly rates (standard, prime time, etc.) as well as flat rates (half-day, full day, etc.). You can also group your rates by the types of customers who reserve them (i.e. Resident, Non-Resident, Non-Profit, etc.) to gain the maximum amount of your rental dollar. Separating facilities into distinct complexes makes scheduling, billing and reporting easier.



Scheduling. Book a single event or a recurring schedule (Hourly, Daily, Weekly, Monthly, and custom date list) to handle repetitive dates and times. Copy event schedules from on season to the next. The scheduling grid accommodates a variety of methods of viewing your reservations, choose from displaying multiple facilities on multiple dates to showing a single facility for a single date. The scheduling grid can be color coded by customer balance, event type, and customer type. Other Charges (i.e. tables, chairs, Birthday Party packages, etc.) can be added to scheduled events.

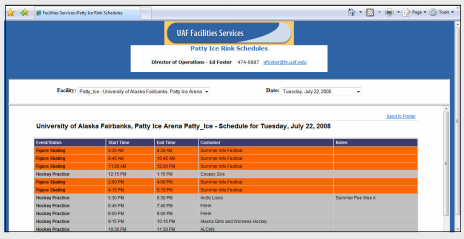
Changes Made Simple. Assume your schedule is created and you need to make multiple changes to either a customers schedule or events happening at your facility. Our unique Mass Edit feature allows you to make these necessary changes without having to go through each one. The best benefit is that if you make a change and update any of the rates, your invoice can auto adjust to reflect those new changes eliminating many steps that are needed in most recreation software packages.

Customer Management. You may need to deal with many different types of clients, MaxEnterprise allows you to do it. Store records in company, family or individual records for easier record management. The software supports customer-specific hourly rates, handles billing to a parent entity, as well as taxable versus tax-exempt status.

Reporting and Receivables. Options include: preparing or deleting invoice batches, conducting invoice inquiries, entering payments or credits, auto-applying credits, GL Accounts and Taxes. Handles multiple tax levels and rates -at either the facility or customer level. Over 50 reports to track every aspect of your reservations.

Multi-user version available with customizable user groups, individual logins, passwords and access levels.

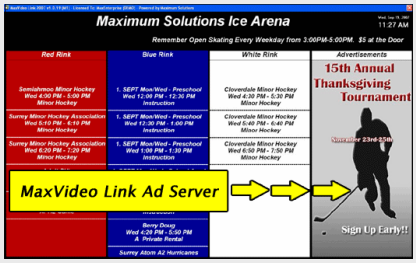
Web Reporting for Facility Scheduling



MaxWeb Link (Web Enabled Reporting)

Display facility schedules and availability, as well as event schedules on your website. The reports are auto-updating which means you enter something in the desktop software, your website reflects this change as well.

TV Display of Facility Information



MaxVideo Link and Ad Server

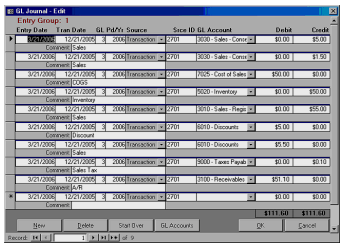
Display facility and event schedules on TV Monitors. Promote upcoming events and activities. Also sell advertising space to gain incoming revenues with Ad Server.

MaxEnterprise

Enhancement Application Add-ons

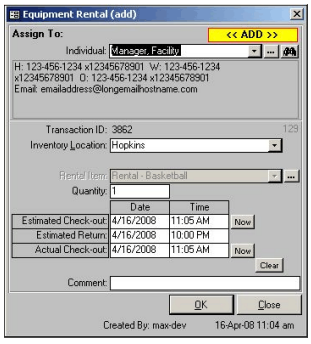
Energy Control Integration

MaxControl integrates into your existing arena control software to automatically adjust lighting and temperature based on the event or customer who is using your facility.



General Ledger Exporting

Export your MaxEnterprise data into your financial software.



Equipment Rental and Tracking

Do you have equipment that needs to be tracked with facility rentals or on its own? Handle equipment reservation, check-in and check-out of items.
