

Welcome to MaxSolutions Online (MSO)

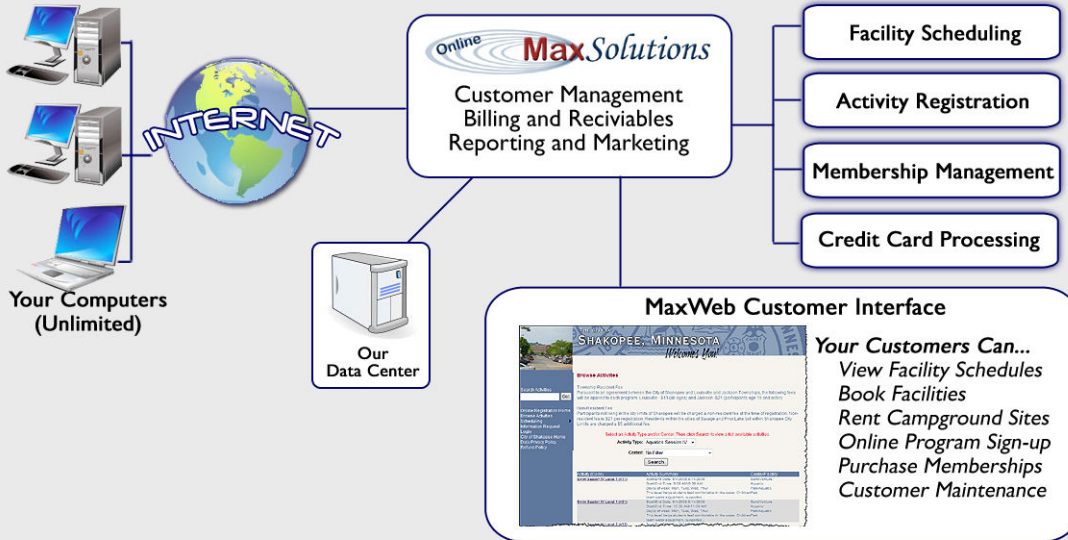

Fully Web Hosted Recreation Management Software

Handling the every-changing customer demands and headaches you put up with seem endless: managing courses and offerings, processing paper enrollments, trying to find and identify missing forms, tracking and reporting data in real time, dealing with irate customers when they show up thinking they can sign up for a class that's already filled, double booking a rental facility and possibly losing business. The list could go on and on. Many organizations and departments even budget for yearly losses because of all the hours spent on managing an ineffective system!

Now imagine a system that does everything you need it to do — a system that's fast, easy, and secure. Now match benefits to a system that is fully integrated to a single financial database for better customer and billing management. MaxSolutions is our exciting web hosted software platform which allows you to manage your departments operations anywhere you can access the internet.

How MaxSolutions Online Works...

The Web Interface Integrates Seamlessly to your existing Website

PCI Compliant, Hacker Safe!

MaxSolutions Online Benefits

No Hardware, No Software, No Maintenance. No costly servers or software are necessary. All you need is your PC and an internet connection. Maximum Solutions performs all upgrades, updates, and data backups. Access your database from anywhere there is Internet availability. Logon from other administrative offices, from different facilities, from home, or even while you are on vacation. Access the software 24-hours a day, 7 days a week.

Cost Effective ASP Approach. No capital budget expenditure. With a very low start up cost, you can essentially lease the software through monthly payments while maintaining ownership of the data.

Flexibility. Combine any of the following applications: Facility Reservation, Activity Registration, Membership Management, Customer Interface and/or Credit card Processing. You can also customize your users of the software by access rights to determine what they can do in the software.

Eliminate Data Redundancy. All MaxSolutions Online applications are fully integrated and share one common database. For example: the process of setting up an Activity in the Activity Registration module automatically books out the corresponding facility(s) in the Facility Reservation module.

Improve Customer Service. Community members can view activity offerings (i.e. classes, schedules, fees, instructors, prerequisites, etc.), facility schedules (i.e. open gym, lap swim, public skate, etc.), and membership options (i.e. individual, family, etc.) online. In addition, all registrations, reservations, and purchases can be completed online instead of requiring a trip to the facility. Build customer intimacy with immediate response to inquiries and instant email delivery of invoices and documents. Store records in company, family or individual records for easier record management. The software supports customer-specific hourly rates, handles billing to a parent entity, as well as taxable versus tax-exempt status.

Save Employee Time. No more searching for your scheduling book or locating paper registration documents. Your staff has one centralized location to view all operations. At the same time your employees will field fewer questions and phone calls because community members now have the ability to access activity, facility, and membership information online.

Reporting and Receivables. Options include: preparing or deleting invoice batches, conducting invoice inquiries, entering payments or credits, auto-applying credits, GL Accounts and Taxes. Handles multiple tax levels and rates -at either the facility or customer level. The MaxSolutions Online system supports cash payments, checks, credit cards, monthly direct deposits, house accounts, balance forward, invoices, credits, etc.

Application Offerings

- Hosted Facility Scheduling
- Hosted Activity Registration
- Hosted Membership Management
- Credit Card Processing
- MaxWeb Customer Interface for:
 - Online Facility Calendars
 - Campground Reservations
 - Online Bookings
 - Online Registration
 - Membership Purchases
